DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 10/16/06 have been fully considered but they are not persuasive.

The applicant argues on pages 8 and 9 of the response in essence that:

Safai et al. do not disclose images that were pre-stored by a device other than the portable communication terminal.

- a. Safai et al. disclose uploading images that are stored on a server (col. 15, lines 33-40). The camera of Safai et al. is responsible for transferring the images to the server, however it is the server that stores the images within the server's memory. Therefore, the images are pre-stored by the server.

The applicant argues on pages 9 and 10 of the response in essence that:

Safai et al. do not disclose a caller's number of the portable communication terminal.

- b. Safai et al. disclose the camera calling the server (col. 13, lines 39-47). The camera calling the server requires the use of a phone line (i.e. phone number), and thus corresponds to the telephone number of the user (col. 13, lines 54-65).

Claim Rejections - 35 USC § 102

Art Unit: 2625

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 37 is rejected under 35 U.S.C. 102(e) as being anticipated by Safai et al. Patent 6,167,469.

Referring to claim 37, Safai et al. disclose a method comprising: acquiring a caller's number of a portable communication terminal (col. 13, lines 54-65), when the portable communication terminal accesses a server through a network (col. 13, lines 39-47); causing the portable communication terminal to display thumbnails corresponding to pre-stored images on the server that were pre-stored by a device other than the portable communication terminal (col. 10, lines 33-37); determining, at the server, whether the portable communication terminal has issued a registration command to register at least one of the images on the server corresponding to at least one of the thumbnails displayed by the portable communication terminal (col. 13, lines 10-24); and relating, at the server, the at least one selected image with the caller's number of the portable communication terminal and storing the selected image in association with the caller's number of the portable communication terminal when it is determined that the portable communication terminal has issued the registration command (col. 14, lines 35-39) (col. 13, lines 39-47).

Allowable Subject Matter

4. Claims 38 and 39 are allowed.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
